It is located on the right or north side of the Cumberland River, at the point where the Red River empties itself into the former stream. There were at one time two good banks established in the place, and four r five newspaper offices. On the whole, revious to the breaking out of the rebellion, gave great promise of being a rising place

but at the present time it appears to have greatly retrograded. In the neighborhood of Clarksville and for ome distance farther up the river, are a number of bluffs, some of which are precipitous and difficult of access. These have been made use of for the purpose of fortification, and extensive and formidable rebei tion for two or three months. ber of beavy guns are reported to have been shipped to this point, for the purpose, so it is said, of protecting the railroad bridge and the communication with the Capital of the State. It is also reported that ten thousand men left Bowling Green two or three weeks since to reinforce this point, and further, that General Hardee was in command of the bost. The railroad from Louisville, via Bowling Green and Russellville, passes through the village, and it crosses the Cum-berland at this point by a valuable bridge. What troops may recently have been at there two last named places have doubtless ere this been sent forward to Clarksville.
As Bowling Green is now in the hands of the Union troops, a road is now open to Clarksville along the railroad, by which it is not at all unlikely our troops may march from General Buel's Department upon the

rebel rear at that place.

Bowling Green, recently taken possession
of by the Union forces, is in direct railread
connection with Nashville. This road crosses
no important river, and, therefore, can not
be materially injured as a marching road for
our troops. Thus not only is Clarksville
threatened from this point, by the one railroad but Nashville is rebel rear at that place. road, but Nashville is in jeopardy by the

Eleven miles south of Bowling Green, along the railroad track, is a small station known by the name of Woodbarn. At this point the brigades of Generals Breckinridge ad Hindman were located on Thursday last, but have since been reported as having gone to Russellville. They have doubtless before this marched to Nashville. It is believed, however, that no rebel forces exist in Ken-tucky east of the direct road from Bowling Green, wie Franklin to Nashville. It is located on Drake's creek, and con-

habitants. Nearly due east of Nashville is the city of Recaville, upon which point General Thomas is advancing, in a southerly direc-tion, by three routes—from Somerset, Monti-cello and Cumberland Gap.

It is reported that General Crittenden is

ying to organize another army at Carthag on the banks of the Cumberland. This is supposed to be the only rebel force on the line om General Buel's department to Nashville arthage is a post village of Smith County, Tennessee, and is located opposite the mouth of Cancy Fork. It is fifty miles by isnd from Nashville, in an easterly direction, and had at one time an academy and one or two churches.

Jessie Fremont A correspondent of the Iowa State Register

thus speaks of Jessie Fremont: I sat to-day talking an hour with General and Mrs. Fremont; soon after with those who bitterly oppose them. My heart sickens. Where will all this end? Do you want to know how "Jessie" looks and seems in the midst of her trials? Whatever may be thought of him (Fremont), let every one ght of him (Fremont), let every one if the wife who so nobly shares her husband's anxieties, and is at his side strong in love, in will and energy, to help him to the utmost of her power. The spirit of old Colonel Benton looks out of "Jessie's" eyes. The bright flush of her cheek, the sweet play of her lips, when seconded by the clear ideas of her powerful mind, render her captivating to a remarkable degree. She has scarcely slept or rested since she came to Washing-ton. To see her husband vindicated is the restless burning of her soul, and she is mis-tress of every statistic, every item that can weigh for or against him, and it is easy to see by the dilated nostril and flashing eye, how wholly she believes in Fremont's integrity, and resents his accusers' charges. Abl well I can remember when she stole from her father's house to become the bride of the man whom she has so nobly followed for better or for worse. She was so handsome and gay, and now she appears like some itoms matron, full of dignity and high resolve. have always felt proud of Jessie Fremont and Mrs. Douglas, opposite in character though they be, represent us as American women, for whatever faults they may pos-sess, their minds and hearts have gloriously borne the changes of prosperity and adver

General Pillow.

Gideon J. Pillow was born in Williamson County, Tennessee, in 1806. At an early age he was admitted to the bar, and for some time he was the law partner of President Polk. In July, 1846, he was appointed by Polk a brigadier general of volunteers, and became a major-general in 1847. He com-mended a division through the campaign of General Scott in Mexico, and was wounded at Cerro Gordo and Chepultepec. He made many blunders during the campaign, and, for a time, he was the laughing stock of the soldiers.

HAVING now obtained Foote-hold in Tennessee, we expect to send our Porter or our Butler with a message to our Southern Butler with a message to our Southern friends, and Grant them the privilege of paying their debts to the North, as well as securing their "rights," of which they Bragg much—and may the Pillow under their leaders' heads be as adders and scorpions till they pay the Price of treason, and their rebal carcasses be Polk'd into their traitorous

A disposition has been manifested in the Senate to pass over most of the nominations for Brigadier-Generals for the present, and let the nominees win their stars by gallantry and efficiency in the field before they are confirmed.

A broad line of distinction has been drawn in the Senate between officers who lounge about the hotels or dawdle in drawing-rooms, and those who devote their attention to the improvement of and efficiency of their commands, or in active duties in the field. Whenever there comes up another nomi-nation, of whom and in whose favor there is nothing particularly to be said, by common consent it is passed over to await the future conduct of the candidate, and let him prove
